Subject: regarding the Gardner Intermodal

Greetings,

I understand in this economy every county and state is pushing for more growth and revenue for their city and county. I dont however understand the rush to get this pushed through without proper research as to the effects to this area and our drinking water and air. These are serious issues that you would require if this was going into your area of residence- isn t it? There needs to be an assestment for what this will do to the environment. Pushing this through fast is NOT the long term solution.

I am not totally opposed to this project, i am opposed to it being started without the proper due dillegence as to issue regarding my health and others.

Please do what it right for the people of this area, and then please the corporations needs.

Thanks,

Steve Mabe
